This Self Management Programme is funded by the Western Health and Social Care Trust, managed and delivered by Action Mental Health (AMH)

Learn to manage a long term health condition

Set Goals

Make Positive Changes

Improve Quality of Life!

What is Self Management?

Self management is about living the best life that you can in spite of having a health condition. Whether it's a physical, mental or emotional condition, self management is about you being actively involved in your recovery and developing skills that can enable you to overcome your problems rather than worrying about them. You will understand your condition and symptoms better and learn new techniques to manage and improve your health. You will set goals for yourself and improve your confidence levels, which in turn will assist you in improving your overall quality of life

The Problem

Living with health conditions such as Asthma, Diabetes, MS, Depression, Epilepsy, Fibromyalgia, Pain, Heart Conditions, Cancer, COPD etc. can be very challenging. Dealing with their symptoms and effects can seem like life has become a constant cycle of set-backs and negativity. Your ill health takes over your life for the worse.

Self Management Course

“Managing the Challenge” is a licensed self management course running throughout the Western Health and Social Care Trust area. It is FREE to anyone over 18 years old with a health condition who wish to better manage their condition or to carers who wish the same for their loved one. The course offers the following topics:

Pain Management Techniques
Physical Activity
Healthy Eating Action
Planning Depression
Better Management
Breathing

Relaxation Skills
Dealing with Difficult Emotions
Communication Skills
Problem Solving
Positive Thinking

These skills can help break the negative cycle and put in place better techniques that could lead to positive outcomes for you. You may feel more empowered, confident and positive about life overall

Course Duration

The course has 6 sessions, which take place on the same day of the week for 6 weeks. Each session lasts 2.5 hours. All courses are delivered by two trainers in a group setting of 12-18 people. Trainers have experience with living with a long term condition themselves or working with people that have health conditions . Trainers have been expertly trained to deliver the course and use the licensed course manual to ensure high quality self management training

The Group

The group is made up of people like you who have long term conditions and understand what it is like to deal with symptoms and problems. Group participants are the experts on their own condition. They know what triggers their symptoms and also what works well for them. The experience is invaluable. The support of the group means you are no longer alone.

How to Access Courses

Courses run throughout the Western Health and Social Care Trust area which incorporates the council areas of Limavady, Strabane, Omagh, Fermanagh and Derry City Council.

You can access a course by contacting your local health condition support group, GP, Community Health Team, or by contacting the Programme Coordinator directly on 07545 206 367.
