Patient Information

You have been referred by your General Practitioner (GP), or Hospital to the Community Respiratory Team for assessment, management and support & guidance of your lung condition.

Patients are assessed in hospital, and if they meet the criteria for the service they are discharged home and reviewed by the CRT until they return to their baseline. This may be in the form of a home visit, telephone review and/or a local clinic visit.

Support in the Management of lung disease

This service is for patients who are experiencing an exacerbation of their chronic lung disease. The aim of this service is to prevent unplanned hospital admissions and appropriately manage patients at home.

Community COPD Clinic

The nursing teams are highly skilled and will be in contact with your Doctor to seek help if they are concerned about your condition.

If you have any questions or concerns please raise with a member of our nursing team.

What services does the team provide?

Supported Discharge / In reach

This is a service for respiratory patients to help get them out of hospital as soon as it is safe to do so.

Self-Management Plan

Development of management plans in line with NICE & GOLD Standards

Oxygen Assessments & Review

Pulmonary Rehabilitation

If you require re-admission to hospital at any time during the course of your treatment, the nurse will speak to the Hospital Consultant or GP to assist in your admission.
