Caring Together

Supporting carers through the pandemic and beyond

A Belfast Local Engagement Partnership Event

On Microsoft Teams

11th November 2021 – 2pm to 4.30pm

- The pandemic has emphasised the importance of carers. At this event we want to explore the experience of giving and receiving unpaid care. With carers, people who receive care and people who provide support services we will consider our collective experience of caring during the pandemic. What has it been like? What have been the challenges? What has worked and what changes would we want to keep? And what should post-pandemic caring look like?
- This event will be of interest to carers, people with lived experience of being cared for and receiving services, social workers, social care staff/managers and other service providers. It will also be of interest to people from outside the Belfast area.

Please book your place by emailing:
