

## Omagh Leisure Centre - Thursday 9 February 2023

### Staffing/Recruitment

It is inevitable consultants will not wish to work in SWAH due to 'unknown instability' – what incentives are you providing to them to work in the West?

I have a relative working in SWAH. The staff morale is very poor. They are overworked and concerned for their jobs. Can you ensure protection for the existing staff?

People applied for jobs in SWAH did not meet the selection criteria. What criteria did they not meet and can these criteria not be reviewed so more applicants are shortlisted.

Can you not see the pressure and stress our consultants, doctors, nurses and GPs are under. It isn't right putting these people under such pressure, they will end up leaving, also it isn't right putting people's lives at risk.

### Service Provision

I am a resident in Omagh, we lost the services of the Tyrone County Hospital, we were promised a great hospital in Enniskillen. We are now faced with losing the emergency general surgery services in Enniskillen, once one service goes my fears are another and another service goes, where do we go then?

What provisions have increased in Alt Hospital to cope with SWAH closures?

### Consultation

There is a poor turnout tonight. The reason for this is obviously the public feel the consultation will make no difference. Can you advise if the consultation will make any difference?

Where are our councillors? Are they adopting the Stormont approach!

### Ambulances

How many more ambulances have you in operation since November 2022 in the Western area?

(Questions numbered 1-4 received in this manner from participant but broken up into the themes.)
